

One Result Comparison: Web vs PDF Report

Case: South/South-West Coast, 350 rooms, sustainable tourism premium scenario = No. The PDF report uses the same backend result object as the web calculation, so these values should match exactly.

Metric	Web Output	PDF Output	Difference
Rooms	350	350	0
Absorption chiller	1000 RT	1000 RT	0
Turbine	1250 kW	1250 kW	0
Net initial investment	LKR 597,551,895	LKR 597,551,895	0
Annual grid export	8,340,517.56 kWh/y	8,340,517.56 kWh/y	0
Year-1 net savings	LKR 282,871,429	LKR 282,871,429	0
NPV	LKR 1,448,141,729	LKR 1,448,141,729	0
IRR	46.70%	46.70%	0
Profitability index	3.423	3.423	0
Simple payback	2.11 years	2.11 years	0
Discounted payback	2.60 years	2.60 years	0

Conclusion

The web calculation and PDF report output match for this reference case. Any difference seen after this should come from using different inputs, an older PDF, or not refreshing/re-generating the report after calculation changes.
